

Kingsford Primary School Alert Level 3 Update

Kia ora Kingsford whānau ,

Government has kept with their cautious approach when responding to COVID-19, and as a result, we will stay at Alert Level 3 for a bit longer.

We are proud of how our community has responded to this outbreak. Please continue to follow all the alert level requirements including staying at home and getting tested for COVID-19 if you are feeling unwell.

I have included some [information about vaccinations](#) to support decision making.

At full Alert Level 3 you legally must stay within your household bubble unless for essential personal movement, including going to work and going to school. We are therefore open once more on Monday for only the small number of children who need to attend. All our usual safety precautions for Alert Level 3 will be in place which include all the recommendations from the public health experts. This means students will be kept in bubbles of no more than 10.

Children under 12 years of age remain exempted from wearing face coverings but are encouraged to do so.

Our staff on-site will also have been tested for COVID-19 before they get back to work and so we are all playing our part in keeping our community safe.

We will continue to support all children who remain learning from home through our distance learning programme.

While we know how difficult it is trying to work from home as well as support your child's learning, please keep your child at home if there is an appropriate carer available. For those of you with no other option, we look forward to seeing your child at school next week.

For parents conducting student pick-ups and drop-offs, these should occur in an outdoor environment where face coverings must be worn, and physical distancing measures retained. Parents, whānau and caregivers are not required to be vaccinated or tested in order to pick up or drop off children.

It is now legally required that we hold a COVID-19 vaccination register for all eligible students and staff. If we were to have a case of COVID-19 in our school, public health authorities will want to know if we are a school with a high vaccination rate. This information will then be used as part of the local health authority's risk assessment. The more highly vaccinated we are (staff and eligible students), the less likely it will be that we will have to close down for a long period of time, or we might not need to close at all.

These are the very best things we can do to keep our community as safe as possible and get everyone back to school.

Ngā mihi,
Chris Williams
Principal
